Self Defence is the act of defending oneself, one's property or someone else from physical harm. Self Defence has an important role in the life of women. Crime is on the rise, especially among women. And it doesn't matter where you live or work, you are at risk of becoming a victim of a violent or intrusive crime. While so much attention is given to Academic Education, one should not consider Self Defence as useless or redundant because just like academics is important for our future, self-defence is important for our safety.
